A close-up photograph of a person's hand resting on a dark, textured surface. The hand is positioned in the lower right quadrant. Overlaid on the image is large, semi-transparent text. The main headline is in white, bold, sans-serif font. Below it, the words 'Meaningful Un' are written in a much larger, grey, sans-serif font, partially obscured by the hand and the headline.

When it comes to **ultimate home comfort solutions**, there's only One....

We are totally focussed on developing products that let you experience ultimate home comfort. We are committed to delivering **simple solutions** by introducing **meaningful innovations** that are **truly universal**.

With our products sold in over 13,000 stores across Europe, we are a true specialist when it comes to digital audio-video accessories.

When it comes to understanding what users want, there's only One... Mini

One For All® is the consumer brand of Universal Electronics Inc., the world leader in wireless control solutions. In our almost 22-year existence, we have introduced the most user-friendly products to the market in our role as a technology partner to the major players and brands in the home entertainment industry. As a result, we have gained extensive knowledge of how consumers all over the world interact with their devices.

It is, therefore, no coincidence that most of the A-brand, consumer electronics hardware manufacturers and Subscription Broadcasting companies use our technology for their devices. Over 250,000,000 consumers all over the world interact with Universal Electronics technology every day.

That is why One For All®, like no other, is able to come up with new, interactive ways of enhancing a user's experience.

It is not the number of codes included in the handset that makes the most reliable remote, but the codes' relevance to specific markets and habits. That is what makes UEI's code database unique within the industry. With over 1,000,000 universal remote controls equipped with UEI technology sold every week, the UEI Device Codes Database is the largest and most comprehensive in the world. The fact that we have device capture-centres located throughout the world means that our database is continuously updated with device codes for the new products coming to the market every day.

When it comes to
a guarantee to work all brands
there's only One...

To reinforce our expansion efforts in terms of product portfolio, our database, which until now has only included IR codes, is now expanding to include much more data about the size, weight, inputs, VESA standards and other metadata, of all existing TV sets and other A/V equipment. This knowledge helps us develop new products with which we can provide comprehensive universal solutions.

When it comes to **simplicity**
there's only One...

Despite the increasing complexity and digitalisation of home entertainment, most customers simply want to enjoy their products, without hassle and without having to spend hours setting them up and making them work properly. We are, however, fully aware of the fact that there are always a few unanswered questions, no matter how simple and straightforward set-up procedures may be.

le

That is why we provide the in-house One For All® Customer Care Centre to care for and learn from our users. We truly believe that ultimate home comfort is not something our clients and users should have to figure out for themselves. It is something they should just be able to enjoy!

"One remote for all my devices? Why not?"

Award winning user-friendliness,
performance and design

Universal Remote Controls

One For All® Universal Remote Controls

A One For All® universal remote control is, in fact, an extension of you and allows you to control, expand and enhance the multi-media experience throughout your home. Meaningful innovative technology packaged into a stylish and easy-to-use device which serves one sole purpose, to make your life more enjoyable. One For All® Universal Remote Controls are truly universal and come with a guarantee to work with ALL brands. The devices are divided into three main categories and you can rest assured that there will be a universal remote control that will exactly meet your requirements, lifestyle and budget.

"I just want a simple remote to do what it's supposed to do..."

No nonsense, no fuss. Just a Universal Remote Control to simply operate your TV or up to 4 devices within your home entertainment set-up. The Basic Line of universal remote controls make great replacements for lost or broken remotes, while the Zapper is perfect as an 'extra' for the TV in the kitchen or bedroom to add a bit of simplicity to your life...

Perfectly simple

UNIVERSAL

One remote controlling multiple devices and different brands. Thanks to the world's most comprehensive One For All® device codes database, we guarantee that your remote will work with any device from any brand.

DIGITAL TV

Controls multiple digital TV services, as provided by your Subscription Broadcasting company and interacts with your digital set top box.

QUICK & EASY SET UP

One-off set-up code entry for each device. Every device from each brand works with a unique code which you can find in the remote control's user manual. Simply enter the code which corresponds to the device type and brand you wish to operate. It's as simple as that.

SERVICE & SUPPORT

Peace of mind for customer and consumers. Our award winning Customer Care Centre focuses on making sure that customers can always control the device of their choice. In the unlikely event that a specific code is not available or recognised, we will ask the consumer to send us the original remote control and will upgrade the One For All® device free of charge.

QUICK & EASY SET-UP

ULTRA SLIM

“To control all my home entertainment devices,
I want simplicity and optimal comfort.”

The name says it all: Comfort. Universal remotes that are designed to fit perfectly in your hand, can be used effortlessly and, thanks to One For All's SimpleSet, are very easy to install. Whether your home is hectic or relaxed, whether you need a stylish remote or prefer one that can take the knocks of family life, there's a Comfort remote to suit your way of fully enjoying your home entertainment equipment.

The ultimate feeling of convenience

COMBI CONTROL
Control your TV and set-top-box as if they were one. The automatically installed Combi Control button allows you to control the TV volume and your set-top-box channels without having to switch the One For All® remote's control mode.

1, 2, 3 SIMPLE SET
Just three key-presses to set up your brand. The simplest way to set up your devices to work with One For All® universal remote control. No need to enter device codes. The remote does it all, automatically, for the 10 most popular brands per device type.

LEARNING
Add any function from your original remote control. By activating the learning mode you can copy a specific function from your original remote to any key on your One For All®. Simply point the original remote control towards the front of the One For All® and press the key on which you want to locate this function. Then press the key you want to copy, and repeat for more functions.

One For All® SimpleSet

Set-up your device in 3 easy steps.

- 1** Hold down the "magic" key on your One For All® remote
- 2** Select the device you want to operate, e.g. TV
- 3** Press and hold a numeric key corresponding with your device brand, as indicated in the brand list supplied with the remote, and wait until the selected device (e.g. TV) switches off. The TV can now be controlled with the One For All® remote control.

Comfort

Essence Line

Control your home entertainment system with simplicity. Make your digital TV watching experience easier to control. The Combi Control function enables you to control the TV and the set-top-box as if they are one.

- Learning - add any function of your original remote

“Full control. No matter what,
no matter when, no matter where.
That’s what I want.”

The absolute Power of Control

If you would rather not compromise on functionality or convenience, a universal remote in the Advanced series is perfect for you. It combines elegance, ergonomic simplicity, state-of-the-art technology and incredible ease of use. Experience the power of having complete control of your home entertainment environment and optimal interactivity. Just make it work exactly the way you want it to, by personalising any command and by creating different favourites lists.

SO SIMPLE

SO SIMPLE

Believe it or not, the Xsight™ remote is so incredibly **easy to set-up** that you do not even need a manual. Just follow the instructions on the screen in your local language and you will be ready in a matter of minutes.

SO ADVANCED

SO ADVANCED

The Xsight™ remote allows you to control up to **18 devices** from virtually any brand you can think of. Activity control even allows you to operate more than one device with a **single press of a button**. And the unique **EZ-RC™** internet application means you can fine-tune all advanced settings and make it truly yours.

SO PERSONAL

SO PERSONAL

The **colour screen** is easily personalised to suit you and every other user in your home. Imagine a personalised **channel list**, enhanced with familiar **channel logos**. Your personal way of taking control.

Advanced

RF Extender

- Control your equipment inside cabinets with Xsight™ Touch RF Extender

“Crystal clear reception for the sharpest picture and the purest sound, without a fuss.”

Aerials

SIGNAL CLEAR TECHNOLOGY FOR BEST SIGNAL QUALITY.

Boosts picture quality, not interference. Especially for DVB-T / Freeview reception.

BUILT-IN NOISE FILTER

One For All® incorporates multiple stages of signal filtering to take out irrelevant signals from Bluetooth, WiFi, DECT and other RF (Radio Frequency) devices and minimise signal interference from other external sources. The built-in noise filter ensures that only relevant digital information is passed through the tuner and provides crystal clear reception and the “purest” signal.

BUILT-IN FILTER+

In addition to the built-in noise filter, Filter+ is an extra stage of active filtering and includes a GSM block filter that prevents external GSM interference from blocking the signal. It ensures crystal clear reception of digital signals.

FULL HD PERFORMANCE

The HD design line aerials are designed for the best possible reception. Patch Technology enables maximum signal capture for next generation HD broadcast signals. With wide, ultra wide and 360° reception angles, it enhances the performance of every HD-ready or full-HD TV, Set Top Box and even Computer and Playstation (PlayTV).

At One For All® we take pride in combining functionality and design. When designing aerials our priority is to ensure the best possible reception. Whether you still receive conventional analogue broadcasts or have already made the transition to Terrestrial Digital Video Broadcasts (DVB-T), you can choose between indoor and outdoor aerials plus stylish indoor specials that blend in with modern home interiors. Aerials that look great but don't shout about it...

A photograph of a man with short dark hair, wearing a white dress shirt and a striped tie. He is leaning back in a chair, resting his right arm on the backrest. He has a slight smile and is looking towards the camera. The background is a blurred office setting.

“I want value for money.
Actually, a lot of value...”

Value Line

Designed for crystal clear signal reception, the One For All® conventional indoor aerials feature innovative technology that enhances picture quality. With or without an amplifier.

SV-9153

- For perfect reception of DVB-T (Freeview) television and DAB radio signals
- Compatible with HD signals
- Adjustable amplifier to boost signal gain up to 45dB
- Minimal interference through the active noise reduction filters, including GSM block filter

SV-9143

- For perfect reception of DVB-T (Freeview) television and DAB radio signals

"I never want to be
out of power."

Charging Solutions

Energy efficient solutions

Simply Click and Charge!

Struggling with different chargers for different devices has come to an end. Locate all your chargers in one place, without the hassle of cables lying around your home. Never have to search for the right charger to fit your phone, camera or iPod again.

Always have a reliable charger with you when travelling. Wherever you are, your own travel power-pack will supply you with enough power for your portable devices, even when there are no power sockets available.

While on the road, turn your cigarette lighter socket into a charging station for your portable devices. With the car power socket you can even have your own reliable 220V power source on the go, to safely charge your laptop. That's what the One For All® Power solutions are all about.

Multi Charger

Simply Click:
